**To Whom It May Concern:**

North Peace Communications Ltd. is one of the leading communication companies in Northeast British Columbia, offering two-way radio systems, repeaters, fiber optic parts and service, intrinsically safe radios, cell booster, voice and data radios, microwave and high bandwidth satellite solutions.

We are also located in the #1 location in North America for oil and gas exploration. Northeast BC has one of the largest shale natural gas deposits in the world. And we are situated right in the middle of this fast growing economic region!

We are always looking for qualified junior / senior technicians who aren't afraid to climb towers. We have work immediately and can offer a variety of jobs. These dynamic positions are focused on the latest technology. Our services include building, inspecting and climbing of towers. Applicants with high angle rescue and fall arrest training would be an asset.

Our core service offerings include fiber optic splicing/testing, as well as troubleshooting and maintenance contracts. Some of our work includes camp jobs (sometimes for a week at a time). Being able to travel out of town is essential during our busy season.

A Class 5 driver's licence (abstract required) is mandatory. Our projects can involve a lot of travel in all weather conditions.

Our goal – we are looking for senior and junior techs with some RF and tower climbing experience. Tower climbing is never done alone – safety is everyone's responsibility and we make it a priority. We value and support our clients. Therefore it is important that our staff have great people skills.

If you know of anyone looking for a great career, interested in living in the north and in a community that is affordable then contact us at the numbers below and we can share more information.

If you have any questions, please do not hesitate to call me directly by phone at 250-782-6664, or contact me at [ria@northpeacecom.ca](mailto:ria@northpeacecom.ca). Thank you for your assistance.
